Beyond Moments and Shears: Practical Design Considerations of Post-Tensioned Concrete

by

Ted Neff
Executive Director of the Post-Tensioning Institute
Farmington Hills, Michigan

Thursday, March 8, 2012
4:30 p.m. – 5:30 p.m.
Room 2305 GGBL

BIO: Ted Neff is the Executive Director of the Post-Tensioning Institute. He has served in this capacity since 2000 and is responsible for managing all of PTI’s technical and educational programs. Previously, he managed his own consulting firm, and has served as a vice president with the Concrete Reinforcing Steel Institute. Prior to that, Neff worked for the Urban Mass Transportation Administration and the Federal Highway Administration.

He is a Fellow of the American Concrete Institute and is currently a member of ACI Subcommittee 318-G (Standard Building Code --Precast and Prestressed Concrete) and Committees 222 (Corrosion of Metals in Concrete), 423 (Prestressed Concrete), 301 (Specifications for Concrete) and 325 (Concrete Pavements). He also serves as the Deputy-Chair of the fédération internationale du béton (fib) Commission 9 Reinforcing and Prestressing Materials and Systems. Neff is a graduate of the University of Colorado with a B.S. in Civil Engineering. He is also a registered professional engineer.
