Deep Excavation Shoring Systems

Dan Williamson
Branch Manager, National Trench Safety, LLC
Chicago, Illinois

National Trench Safety, LLC will present a slide presentation and discussion of deep excavation shoring systems they are currently providing to engineering construction contractors. The presentation will feature aspects of the equipment design, site specific engineering, and implementation of slide rail, sheeting guide frames, and hydraulic brace systems.

4:00 pm Wednesday January 22, 2014
Room 2355 GG Brown
